CIR 381

WERE YOU RECENTLY DIAGNOSED WITH HIV?

The Johns Hopkins CIR is looking for people who are newly diagnosed with HIV (within the last 12-18 months) and have not started or are not currently taking treatment for HIV to participate in a **9 month long** Phase 1 outpatient clinical trial to test a potential new medication for HIV. Eligibility for participation will be confirmed by a clinical trial doctor prior to enrollment. Clinical trial visits will take place in person at the CIR in Baltimore.

**16
visits**

**Males &
Females
18 - 65
years old**

**Time and
Travel
Reimbursement**
